*: Press and hold the **"PWR/VOL"** knob for 3 seconds or more to turn off the screen and restart the navigation system. Do this when the vehicle-mounted device response is extremely slow.

INFORMATION

- Remove dirt from the display and its surrounding area by lightly wiping with a soft, dry cloth, such as a cloth used for cleaning glasses with plastic lenses. Scrubbing too hard or using a hard cloth could scratch the display. Also, the display is treated with a coating, and could be damaged by coming into contact with benzine or alkaline solution.
- When the screen is viewed through polarized sunglasses, a rainbow pattern may appear on the screen due to optical characteristics of the screen. If this is disturbing, please operate the screen without polarized sunglasses.
- When the vehicle travels out of the coverage area, the guidance screen changes to the compass mode screen.
  Information about the destination, current position and a compass is displayed on the compass mode screen.
  Also the destination mark is displayed in the direction of the destination. When driving, refer to the longitude and latitude coordinates, and the compass, to make sure that the vehicle is headed in the direction of the destination.
